## "Pocket" Hard Disk Drive

The Avastor PDX "Pocket" Hard Drive is the perfect ultra-portable data management system for media-rich digital content such as video, music, and photos. Designed for the professional, the PDX comes equipped with the capability to enable users to take their data wherever they go. The PDX is travel-ready and offers the world's highest capacity 2.5" external hard disk solution featuring a rugged, durable aluminum case that houses a SATA II hard drive and up to 1TB of storage space. The heavy duty, compact design is built using the latest mobile hard disk technology providing a professional solution for users looking for a portable hard drive with industry-leading capacity.

### Key Features:

- Wide range of capacities including 160GB, 250GB, 320GB and 500GB in 5400 RPM and 320GB and 500GB in 7200 RPM
- Oxford Semiconductor 934 chipset in the PDX 800 "Triple" ensures maximum transfer rates and compatibility
- Heavy duty extruded aluminum case and grill provide maximum airflow for low operating temperatures
- The PDX 800 has dual FireWire 800 ports for superior performance and connectivity when multiple FireWire devices are used
- The PDX comes with a shock resistant case which helps to reduce the effects of impact and provides cable and paperwork storage
- The standard on/off switch helps to maximize battery life on host computers
- Full complement of cables for all data ports including the "Port Saver" cable (PDX 200) and the "Power Saver" cable (PDX 800)
- Industry leading 3 year warranty

### Two Models

Available in two models, PDX 200 and PDX 800, the 200 sports a high speed USB 2.0 port to allow for quick and easy connectivity, and the 800 is equipped with dual FireWire 800 ports, a FireWire 400 and USB 2.0 port for maximum compatibility and fastest transfer rates.

### Bus Powered

The PDX is bus-powered. No external power supply is required, allowing a computer to power it without an external power source - just plug the drive into any available USB, FireWire 400/800 and it's ready for use. Most FireWire and USB ports provide enough power to the PDX. If the port you are connecting to does not power, such as the Sony iLink (4pin FireWire), the PDX 800 includes a unique "Power Saver" USB power cable which allows 5VDC to be tapped from the USB port while maintaining the use of the USB port for other USB devices.

### Speed and Compatibility

The PDX 800 uses the Oxford Semiconductor 934 chipset. Only the Oxford chipset assures unprecedented performance and compatibility across the wide variety of computer platforms and FireWire devices. At Avastor, only the Oxford Semiconductor chipset is used in every Firewire enclosure shipped.

### Carry Case

Users can be assured that their data will be protected with a shock resistant carry case, which helps to reduce the effect of impact.

### Three-Year Warranty

Every PDX hard disk drive is backed by a comprehensive limited three-year warranty.

# PDX

## Professional 2.5" External Hard Drive

- Both PDX models feature a heavy duty extruded aluminum case and an innovative grill, which allows for airflow and low operating temperatures.
- Both the PDX-200 and PDX-800 are available in capacity ranges from 160GB to 1TB all in the 2.5" form factor.
- The PDX-800 uses the Oxford 934 chip-set to ensure compatibility across the widest variety of computer platforms and software.
- The PDX-800 has dual FW800 ports for optimum connectivity and daisy chaining capability
- Every Avastor PDX is backed by the "Best in the Business" 3 year warranty with Advanced Replacement.
