

XD5

Professional Desktop RAID

The Avastor XD5 Desktop RAID series is designed for the most demanding storage applications. The XD5 trayless and tool-free design allows fast and easy installation of all five hard drives. At its heart is a user configurable hardware RAID engine that supports multi RAID functions to maximize speed and protection of your data. The USB 3.0, eSATA, FireWire 400 and 800 interfaces, provide you with unsurpassed data transfer performance. The XD5 is your best choice for a high capacity, high speed data storage solution.

Key Features:

- Compact size for easy desktop storage
- True Quad Interface with USB3.0, FireWire 400 and 800, and eSATA
- Trayless and screwless design for fast drive mounting and changing
- The XD5 supports five 3TB SATA HDD's for a total capacity of 15TB
- Easy to read LED indicators for power, HDD activity and RAID status
- Key lock design to avoid accidental removal
- Internal 100/240V switchable power supply
- Two ultra-quiet 6cm fans for excellent low temperature operation
- Easily selectable RAID Modes: 0, 1, 3, 5, 10, SPAN and Independent via hardware RAID controller
- Auto rebuild mode when using RAID modes: 0+1 (10), 3, and 5 for fast recovery from a defective hard drive
- Every unit ships in the StoragePak, a heavy duty, foam-lined shipper case

Big Performance On the Go

Every XD5 is packaged in the heavy-duty StoragePak. The case is designed for professionals who need maximum protection for their data. The StoragePack offers outstanding protection whether the XD5 is being shipped, on the road, or just sitting on the shelf.
