

XR4

Professional Rack RAID

The Avastor XR4 RACK RAID series is designed for the most demanding storage applications. The XR4 tray-less and tool free design allows fast and easy installation of all 4 hard drives. At its heart is a user configurable hardware RAID engine that supports multi RAID functions to maximize speed and protection of your data. The USB 3.0, eSATA, FireWire 400 and 800 interfaces, provide you with unsurpassed data transfer performance. The XR4 is your best choice for a high capacity, high speed data transfer rack mountable storage solution.

Key Features:

- True Quad Interface with USB 3.0, FireWire 400 and 800, and eSATA
- Tray-less and screw-less design for fast drive mounting and changing
- The XR4 supports up to four 3TB 7200rpm SATA HDD's for a total capacity of 12TB
- Easy to read LED indicators for power, HDD activity and RAID status
- Internal 100/240V switchable power supply
- Three ultra quiet fans for excellent low temperature operation
- Full 3 year warranty
- Easily selectable RAID Modes: 0, 1, 3, 5, 10, SPAN and Independent via hardware RAID controller

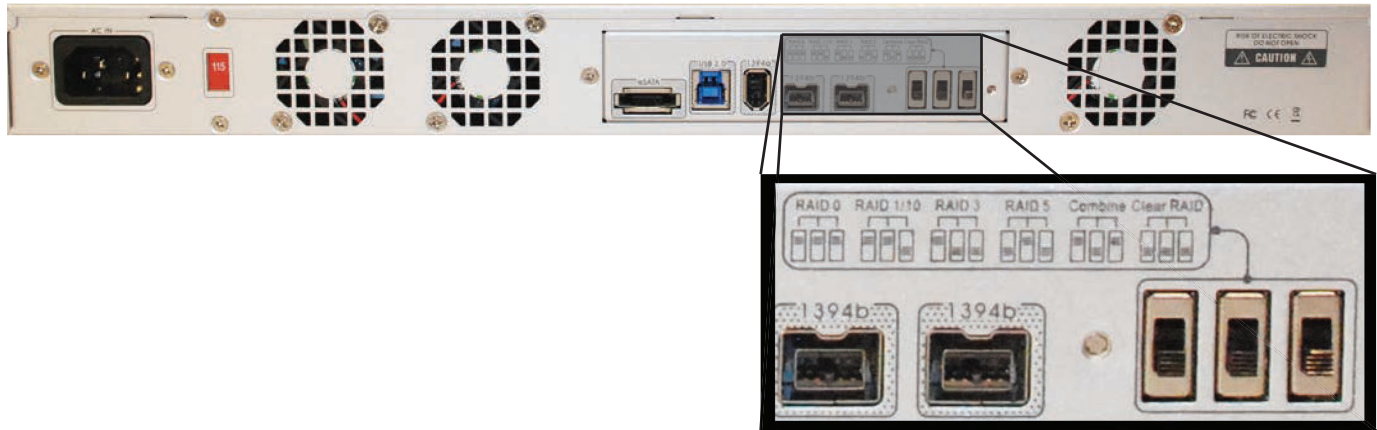

TRAYLESS

The XR4 can be configured for independent mode. This allows the XR4 to be used as a four bay drive dock. The tray-less design allows you to quickly swap drives to review, copy, or transfer data to or from up to four drives.
